INTRODUCTION

Honey Treat Limited is an indigenous Company which is endowed with latest state-of-the-art innovative technologies and human resources for environmental management, building and civil construction, interior and external design finishes, supply of goods and services all over the country.

The company is committed to being a world-class technical service provider and consulting company with a focus on environmental development and management.

Our operational spectrum includes;

- **Building construction,**
- **Civil works**
- **Interior and Exterior finishes to taste**
- **Borehole drilling**
- **Procurement and supply of goods**
- **Project management**
- **and lots more.**

We are Unique

in the following ways:

-  We carry out studies and developmental services using practical innovative skills to solve our client's problems.
-  We bring professionals in a more practical and broad manner to study and solve technical problems.
-  We transfer developed customized technology and train client's operational and management staff to ensure realization of goals.
-  Our approach starts with practical constructive designs and management methodology that eliminates project implementation delays
-  Our knowledge of local customs and working climate enables us to provide innovative solutions in planning, design and project execution phase respectively, thereby keeping implementation programs on track.
-  Our experience in managing large multi-disciplinary projects makes it possible to provide the required expertise to meet clients' needs.
-  Our projects in various parts of the country In previous years are a testimony of our commitment to excellence, professionalism, time consciousness and resourcefulness of our team.

01

OUR MISSION

Building a world where developmental projects could be used to tell our history as Africans, perform desired functions and create interest through the life of the structure.

02

OUR VISSION

To be the best functional space designer and creator in Africa.

QUALITY PLAN

Honeytreat Ltd. is committed to stakeholder satisfaction through total quality management aligned with ISO 9001 standards. QA implementation is the QA manager's responsibility and is independent of production/scheduling.

Quality Assurance Statement

At **Honeytreat Ltd**, our primary objective is to provide high quality services to our clients at the lowest possible competitive cost. Our Standard Procedure is a collection of guide lines of execution plans and procedures tailored to meet the quality requirements of a particular project. In pursuance of these goals, we have modeled a quality assurance program after the international standard organization (ISO) systems. These are

Modeled after ISO systems:

- ISO 9001 – Design/development, production, installation, servicing
- ISO 9002 – Production and installation
- ISO 9003 – Final inspection and testing
